

OpsDesk — Product Release Notes (v1.0)

Internal Operations Walkthrough

For: Buzzworks Operations Team Live at: <https://dev.era.ai> Release date: 16 June 2026 Prepared by: Kirtikar Consulting

How to read this document. Each section walks through one page or feature of the OpsDesk dashboard with: (a) what it is, (b) where to click, (c) what the data means, (d) tips the team should know. Screenshot placeholders are marked **[SCREENSHOT]** — replace with an actual image and the annotated arrows shown beneath each placeholder.

What's New in This Release

#	Feature	Page	Status
1	Server-paginated Inbox — fast load, on-demand drawer detail	/timesheets	live
2	Bulk-approval rules — one-click clearance of clean timesheets	/timesheets	live
3	Weekly day-by-day breakdown — visible in the timesheet drawer	/timesheets	live (NEW)
4	Google-Calendar-style monthly view — per-employee timesheet calendar with approval-coloured cells	/employees/[id]	live
5	Worker profile schema (Phase 1) — 8 tables ready to ingest Fieldglass Worker page data	DB	shipped, ingest pending
6	Pre-aggregated client KPIs — Home Ops-Cost-by-Client chart wired to live rosters	/	live
7	Per-client KPI page — Active / Pending / Payroll / Expenses	/clients/[id]	live
8	Trigram search — fast worker name / email lookup	/employees , /timesheets	live
9	Password-protected access — agent@buzzworks.com + ops password	/login	live
10	Fieldglass + BeeLine ingestion — Capgemini / Accenture timesheet, daily, and expense sheets	backend	live

Data live today: Capgemini (Fieldglass) — 3,620 timesheets, 494 employees, 24,944 day-wise entries, 297 expense sheets, ₹6.5cr March payroll, ₹6.6cr April payroll.

1. Login & Access

The dashboard is gated. Only ops team members with the credentials may sign in.

Annotation arrows:

- Top arrow → email field, "use **agentic@buzzworks.com** "
- Bottom arrow → access-hint card, "password is internal — never leaked client-side"

Tip: the session cookie lasts 8 hours; sign-in once per workday.

2. Inbox — Timesheet Triage

The Inbox is the primary working surface. It lists every pending timesheet across all clients and lets ops triage them with filters, search, bulk rules, and one-click actions.

2.1 Page Structure

[SCREENSHOT 2 – /timesheets, no filter selected]

Inbox	
143 items need your attention	
[Timesheets 143] [Compliance 12] [Onboarding 4] [Payroll 0]	← category tabs
[Needs action 143] [Status ▼] [Client ▼] [Source ▼] [Score ▼]	← filter row
[Has overtime 19] [Clear (3)]	
[Search...] [Sort ▼]	
143 items · 19 flagged · 19 with overtime	Page 1 of 4
🌟 Quick rules:	
[Score ≥ 95, all checks pass 87 ✓] [Portal source, no flags 62 ✓]	← bulk approve
☐ 🕒 CAP VENKATESWARLU GUDIKANDULA · Apr 27–May 3 · 45h ⚡Auto	
☐ 🕒 CAP P KAVYA · Apr 27–May 3 · 45h ⚡Auto 100 →	
☐ ⚠️ CAP RAVI KUMAR · Apr 27–May 3 · 47h (+2 OT) Verify OT 82 →	
...	

Annotation arrows:

- Top arrow → category tabs (Timesheets / Compliance / Onboarding / Payroll); switch focus area
- Middle arrow → filter row (multi-select); narrows the queue
- Bottom arrow → Quick Rules bar; one click approves every timesheet matching the rule

2.2 Row Anatomy

Element	Meaning
Checkbox	Multi-select for bulk approve / flag / reject
Status icon	 pending ·  reviewing ·  flagged ·  approved ·  processed ·  rejected
Client chip	Coloured by client (Capgemini blue, Accenture purple, ...)
Worker name	Full name from Fieldglass / BeeLine portal
Period · hours	"Apr 27 – May 3, 2026 · 45h"; overtime appears as (+2 OT) in amber
Source icon	 portal ·  email ·  manual
AI chip	JARVIS recommendation: Auto-approve / Notify HR / Verify OT pre-approval / Manual review
Score	Validation score 0–100 (green ≥85, amber 60–84, red <60)
Quick Approve button	One-click approve for actionable rows with no failures

2.3 Filters

- **Needs action** — pin to actionable statuses only (pending / reviewing / flagged / pending OT approval).
- **Status** — multi-select across all 7 timesheet statuses.
- **Client** — narrow to one or more real-data clients.
- **Source** — Portal / Email / Manual.
- **Score** — High (≥85), Medium (60–84), Low (<60).
- **Has overtime** — only show rows with OT > 0.
- **Search** — debounced 250 ms — searches worker name, email, employee code, period.

2.4 Drawer (Click Any Row)

[SCREENSHOT 3 – /timesheets with a row expanded – side drawer visible]

INBOX LIST (continues)	DRAWER – Worker · Apr 27 – May 3																						
...	CAP Apr 27 – May 3, 2026																						
▶ ROW IS EXPANDED																							
	Fieldglass Contractor																						
	IT Park – Hyderabad · Capgemini																						
	HOURS																						
	Regular 45h Overtime 0h Leave 0h																						
	Total payable ₹38,250																						
	WEEKLY BREAKDOWN · Apr 27 – May 3	← NEW (this release)																					
	<table><tr><td>MON</td><td>TUE</td><td>WED</td><td>THU</td><td>FRI</td><td>SAT</td><td>SUN</td></tr><tr><td>27</td><td>28</td><td>29</td><td>30</td><td>1</td><td>2</td><td>3</td></tr><tr><td>9h</td><td>9h</td><td>9h</td><td>9h</td><td>9h</td><td>–</td><td>–</td></tr></table>	MON	TUE	WED	THU	FRI	SAT	SUN	27	28	29	30	1	2	3	9h	9h	9h	9h	9h	–	–	
MON	TUE	WED	THU	FRI	SAT	SUN																	
27	28	29	30	1	2	3																	
9h	9h	9h	9h	9h	–	–																	
	Worked 5/7 days · Avg 9h/day																						
	JARVIS · Capgemini policy 95% conf																						
	✓ 45h ✓ Holiday ✓ Leave ✓ Balance																						
	✓ OT mgr ✓ Status																						
	Validation score 100																						
	[✓ Approve timesheet]																						
	[📧 Notify team – flag inconsistencies]																						
	[▶ Flag] [✗ Reject]																						

Annotation arrows:

- Arrow at "WEEKLY BREAKDOWN" → "NEW: Day-by-day strip — shows what hours were logged each day of the week. Same colour palette as the Employee Detail calendar."
- Arrow at "JARVIS" row → "Per-client validation engine — each tile is a rule (45h cap, holiday fill, leave inference, OT approval, etc.)"
- Arrow at action buttons → "Single-click triage — Approve / Flag / Reject / Email manager"

2.5 Bulk Rules

Three preset rules clear the easy stuff in one click:

1. **Score ≥ 95, all checks pass** — auto-approves clean submissions.
2. **Portal source, no flags** — approves portal-synced timesheets with zero failures.

3. **Under 40h, single client** — approves standard non-OT weeks.

Each rule shows the count of rows it would approve on the current page. Click to approve all matching rows at once. Audit log records `approvedBy = "Siddharth Kirtikar (Bulk)"` .

2.6 Manager Escalation (OT > 45h)

If a row has Total Hours > 45 and the worker's manager email is on file, the drawer surfaces a **Request OT approval from manager** button. Clicks open a templated email pre-filled with:

- Worker name, employee code
- Period, regular vs OT split
- Over-cap delta (e.g., "2.5h over 45h cap")
- "Please approve before next month's payroll"

If no manager email exists, falls back to internal team escalation.

3. Employees — Directory

[SCREENSHOT 4 – /employees]

Employees

494 employees

[Client ▼] [Department ▼] [Region ▼] [Status ▼]

← multi-select

[Search...]

Name	Client	Region	Role	Started
B M Ruby	CAP	EPIP industry...	Fieldglass...	—
P Kavya	CAP	IT Park – Hyd...	Fieldglass...	—
...				

Page 1 of 10 · 494 employees

Annotation arrows:

- Filter row → "Server-side filtered; results update on toggle"
- Search box → "Trigram-indexed; finds partial matches instantly even at 494+ rows"
- Pagination → "50 per page; data lazy-loaded as you scroll into the drawer"

3.1 Employee Drawer Tabs

Click any row to open a side drawer with 4 tabs:

Tab	Contents
Overview	KPI strip: total timesheets, approved, flagged, avg validation score. Weekly hours chart (last 7 weeks). Expense sheets card with Invoiced / Pending totals + scrollable list with deep-link to Fieldglass
Timesheets	Filterable list of every timesheet (status, source, approver). Quick view of each
Leave	Annual / sick / casual balance + utilisation bars
Risk Profile	Aggregate of validation failures, OT frequency, late submissions over time

4. Employee Detail Page

Each row in the Employee directory links through to a dedicated profile page at `/employees/[id]` with tabs for **Overview**, **Timesheets**, **Leave**, and **Risk Profile**.

4.1 Google-Calendar-Style Monthly View (NEW)

The Timesheets tab now shows a **Google-Calendar-style monthly view** colour-coded by approval status — the headline new feature in this release.

[SCREENSHOT 5 – /employees/[id] · Timesheets tab · Calendar visible]

April 2026	[<] [Today] [>]	← month nav
178h worked · 18 approved · 4 pending · 8h leave		← summary line
MON TUE WED THU FRI SAT SUN		
1 2 3 4 5 6	← prev month days (dimmed)	
7 8 9 10 11 12 13		
14 15 16 17 18 19 20		
21 22 23 24 25 26 27		
9h 9h 9h 9h 9h – –	← green = approved	
28 29 30 1 2 3 4	← next month days (dimmed)	
9h 8h 8h		
PEN PEN PEN	← orange = pending	
Legend: ■ Approved ■ Pending ■ Leave ■ No submission		

Annotation arrows:

- Top arrow → "Month navigation — left / right slides, 'Today' jumps to current month"

- Mid arrow → "Cell colour by **approval status**, NOT just by hours. Green = approved/processed, Orange = pending/reviewing/flagged, Red = rejected, Indigo = leave"
- Bottom arrow → "Greyed cells = days outside the current month (Google Calendar convention)"

Behaviour Notes

- **Dynamic 5 or 6 rows** — Google Calendar's actual behaviour; the grid shrinks when the month fits in 5 weeks.
- **Today's cell** carries a pink ring outline.
- **Click a cell** with an externalUrl → opens the source portal's day-wise view in a new tab.
- **Header summary** counts approved days, pending days, total worked hours, and leave hours — in-month only.

4.2 Other Tabs

The Overview tab shows the Last-6-Months payroll trend with a NA placeholder for months with no data — keeps the chart honest about partial coverage.

The Risk Profile tab aggregates validation-rule failures over time so ops can spot workers with recurring issues.

5. Client Detail Page

[SCREENSHOT 6 – /clients/cap]

Capgemini	
[Active 494] [Pending 143] [March ₹6.5cr] [April ₹6.6cr]	← KPI strip
[Overview] [Timesheets] [Employees] [Compliance] [Policy] [Payroll]	← tabs
...	

Annotation arrows:

- KPI strip → "Live numbers pulled from `/api/employees/[clientId]` — refreshed on every visit, cached 15s"
- Tabs → "Per-client deep-dive; same structure as the global pages but filtered to this client"

5.1 KPIs Explained

KPI	Source
Active	<code>COUNT(*)</code> on <code>employees</code> where <code>client_id = X</code> and <code>is_test_data = false</code>
Pending	<code>COUNT(*)</code> on <code>timesheets</code> where <code>status IN ('pending','reviewing')</code>
March / April Payroll	<code>SUM(total_payable)</code> on <code>timesheets</code> filtered by month
Expense Invoiced / Pending	<code>SUM(amount)</code> on <code>expense_sheets</code> filtered by status

6. Home — Ops Cost by Client

[SCREENSHOT 7 – /]

Ops Cost by Client		
Real-time monthly cost per client × revenue × efficiency		
Capgemini		494 emp · ₹17.3L / ₹44.5L
Hexaware		85 emp · ₹3L / ₹7.7L
...		

Annotation arrow: "Wired to `/api/clients/summary` — a single SQL query returns all clients' KPIs in one round trip"

Cost model (back-of-envelope, configurable):

- Ops cost ≈ `employees × ₹350 / worker / month`
- Revenue ≈ `employees × ₹9,000 / worker / month`
- Efficiency = cost / revenue (target band: 1–4 %)

7. Backend & Data Sources

7.1 What's Ingested

Source	Pipeline	Volume Today
Fieldglass Supplier Portal (Capgemini)	Playwright scraper (login, jqx-grid pagination, per-TSN search) → JSONL → Postgres	3,620 timesheets, 494 workers, 24,944 day-wise entries, 297 expense sheets
BeeLine (Accenture)	CSV import → Postgres	Inactive until production CSVs arrive
Hexaware / LTIMindtree / PwC	Manual / portal import (planned)	Empty today

7.2 Database (Supabase Postgres, Mumbai region)

8 core tables today:

8 worker-profile tables seeded for the next phase (Fieldglass Worker page snapshot):

The crawler + parser scaffold is in `scripts/scrape-fieldglass-workers.ts` and `scripts/ingest-fieldglass-workers.ts`. Awaiting one sample Fieldglass Worker page to harden tab parsers.

7.3 Performance Indexes

Composite + trigram indexes on the hot paths so server-side filtering / sort / search remain index-bound:

- `(client_id, period_start DESC, status)` — Inbox sort + status filter
- `(employee_id, period_start DESC)` — Employee detail history
- Partial `WHERE overtime_hours > 0` — OT-only filter

- pg_trgm GIN on `employees.name` + `employees.email` — fast ILIKE search

8. Known Limitations / Coming Next

Item	Why it's deferred	When
Beeline ingestion at scale	Real Accenture CSV cadence not yet locked	Phase 2
Fieldglass Worker profile snapshot	Awaiting sample Worker page for parser hardening	Phase 2 (~2 weeks after access)
Compliance overlay (TeamLease RegTech)	Scoped but not built	Phase 2
Payroll handoff (downstream file / API)	Awaiting downstream system contract	Phase 2
Server-side auth (vs client-side password)	Demo-grade today; move to env-var + secure cookie before public exposure	Phase 2

9. Quick-Start Cheat Sheet for Ops

Want to ...	Do this
Triage today's actionable items	Inbox → "Needs action" toggle ON → sort by Lowest score first
Approve all clean timesheets	Inbox → toggle "Needs action" → click rule "Score ≥ 95, all checks pass"
See last week's hours per day for a worker	Inbox → click row → drawer → scroll to Weekly breakdown
Spot OT > 45h	Inbox → "Has overtime" toggle ON
Email a manager for OT approval	Drawer → "Request OT approval from manager" button
See a worker's calendar	Click worker name → goes to <code>/employees/[id]</code> → Timesheets tab
See March vs April payroll for one client	<code>/clients/[id]</code> → KPI strip at the top
Cross-check against the source portal	Any timesheet drawer → "View day-wise on Fieldglass →" link

10. Support & Feedback

Topic	Channel
Bug / unexpected behaviour	Ops Slack #opsdesk-feedback
New feature ask	Same channel, prefixed [feature]
Data discrepancy	Same channel, attach the Inbox row URL + portal screenshot
Production outage	Page on-call (Kirtikar Consulting)

*Document version: v1.0 · Built from commit **60a8689** on 16 June 2026. Replace **[SCREENSHOT N]** placeholders with actual annotated screenshots before circulating widely.*
